2009-2010 SES Provider Application Questions and Answers #8

Question #1

I am filling out the application and noticed there was no place to state what areas in the state we would like to serve. I saw that on your website the approved providers have this listed as well as what the charge is per hour. Am I missing this somewhere in the application or is there another form I need to fill out?

Answer #1

The application does not ask for service areas or fees for service. If an organization is approved to be a provider, the organization will be asked to complete a district selection form identifying the districts the organization would like to serve (typically in May or June). In addition, the application does not ask for fees for service because a provider's fees may vary depending on the districts being served. In the past, IDOE posted fees charged but since the amounts vary and change from district to district and year to year, IDOE no longer requests this information from applicants.

Question #2

How should my application be organized? Should I include a coversheet or title page?

Answer #2

Applicants may include a coversheet or title page with the application but this is not required. The application should be organized by having Part 1 of the application first, Part 2 of the application second, Part 3 of the application third, followed by the signed assurances (mandatory) and the appendix (if applicable).
